testo Smart Probes App  
for free download

The testo Smart Probes mould kit, in combination with the free testo Smart Probes App, is ideal for preventive mould risk identification before this can even occur. This compact and easy-to-transport kit contains two testo Smart Probes testo 605i and testo 805i for measuring ambient temperature, relative air humidity and surface temperature. This makes it perfect for fast identification of mould danger.

The results of the the mould indication are evaluated according to the traffic light principle (green, yellow, red), and can be saved at the press of a button as a PDF, CSV or Excel file, and transferred to other devices or sent directly by email. For the purposes of better visualisation, photos of the affected area are added to the report.

#### testo Smart Probes App

The App turns your smartphone/tablet into the display for up to 6 Testo Smart Probes at the same time. Both the operation of the measuring instruments and the display of the readings are achieved by Bluetooth® via the testo Smart Probes App on your smartphone or tablet – independently of the measuring location. In addition, you can use the App to create measurement reports, add photos and comments to these and send them by e-mail. For iOS and Android.
